sthlmPurple

sthlmGrey

This theme requires that:

1. been designed to compile using pdflatex
2. the following three packages are installed
 - 2.1 beamer
 - 2.2 pgf
 - 2.3 xcolor

This theme has:

- been designed to compile using pdf`l`atex
- the following three packages are installed
 - `beamer`
 - `pgf`
 - `xcolor`

The default Beamer Box

Block Title Here

- point 1
- point 2

```
1 \begin{block}{Block Title Here}
2     \begin{itemize}
3         \item point 1
4         \item point 2
5     \end{itemize}
6 \end{block}
```

Alert Block

Highlight important information.

```
1 \begin{alertblock}{Alert Block}
2     Highlight important information.
3 \end{alertblock}
```

Example Block

Examples can be good.

```
1 \begin{exampleblock}{Example Block}
2     Examples can be good
3 \end{exampleblock}
```

Purple customization

Using the theme colors to generate colored blocks.

```
1 \begingroup
2 \setbeamercolor{block title}{bg=sthlmPurple}
3 \setbeamercolor{block body}{bg=sthlmLightGrey
   }
4 \begin{block}{Custom Blocks}
5     Using the theme colors to generate
6     colored blocks.
7 \end{block}
8 \endgroup
```

FEATURES

IMAGES WITH COPYRIGHT

Table: Selection of window function and their properties

Window	First side lobe	3 dB bandwidth	Roll-off
Rectangular	13.2 dB	0.886 Hz/bin	6 dB/oct
Triangular	26.4 dB	1.276 Hz/bin	12 dB/oct
Hann	31.0 dB	1.442 Hz/bin	18 dB/oct
Hamming	41.0 dB	1.300 Hz/bin	6 dB/oct

Fourier Integral

$$F(j\omega) = \int_{-\infty}^{\infty} f(t) \cdot e^{-j\omega t} dx$$

PGFPLOTS BAR PLOT EXAMPLE

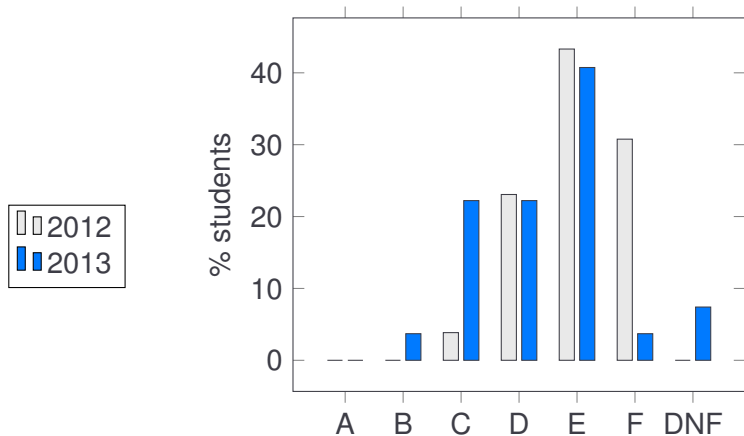

Figure: Consistent improvement over the last year

PGFPLOTS 3-D EXAMPLE

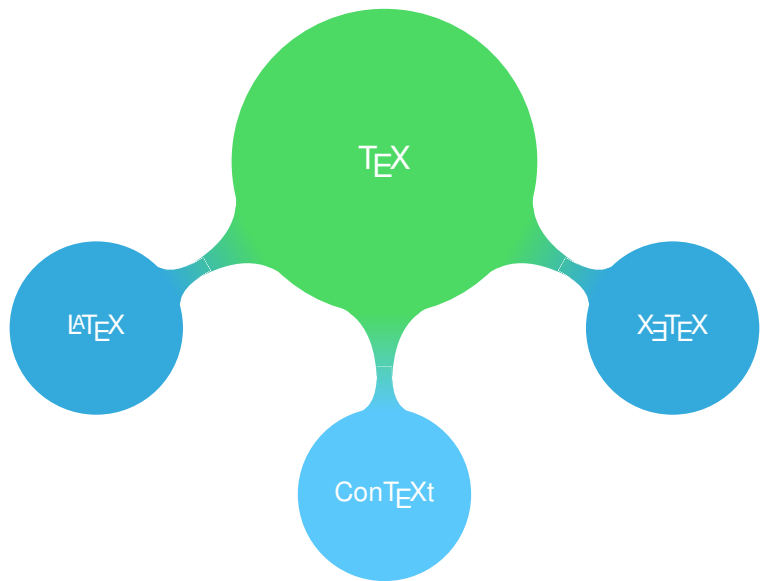

Figure: Easily add beautiful plots

MINDMAP MADE WITH TIKZ

TUTORIAL

THEME OPTIONS

This theme comes with some options to change it's appearance.

Option	Description
<code>nosectionpages</code>	Section pages will be suppressed.

PRESENTATION STRUCTURE

A section page will be generated and the section name included in the presentation header for each section of the presentation with the current section being emphasized. If you include subsections in your presentation, then a small block will appear under the section name in the header for each frame. Once a frame has been viewed it will turn green.

It's worth noting that a frame can make up multiple slides.

```
1 \section{Main Section}
2 \subsection{Main Subsection}
3 \begin{frame}
4 \frametitle{Presentation Structure}
5 % Frame Contents Here
6 \end{frame}
```

TABLE OF CONTENTS

Include a listing of the presentation's sections

```
1 \maketitle
```

For those longer presentations - keep the table of contents compact.

```
1 \begin{frame}{Overview}
2   \tableofcontents[hideallsubsections]
3 \end{frame}
```

At any time you can highlight text by using the `\alert` definition:

- THIS IS SUPER IMPORTANT!

The sthlm presentation has both `>` and `\lstinline!` definitions for quoting text.

`>`This text has been quoted`<`

`»`This text has been double quoted`«`

There are a couple different ways in which you can present your presentation.

- Splitshow (Mac OS X)
<https://code.google.com/p/splitshow/>
- pdf-presenter (Windows)
<https://code.google.com/p/pdf-presenter/>

There are a couple different ways in which you can present your presentation.

- Splitshow (Mac OS X)
<https://code.google.com/p/splitshow/>
- pdf-presenter (Windows)
<https://code.google.com/p/pdf-presenter/>

Let me include a note for this particular slide.

- Splitshow (Mac OS X)
<https://code.google.com/p/splitshow/>
- pdf-presenter (Windows)
<https://code.google.com/p/pdf-presenter/>
